June 2014. I fully understand your desire to share these incredibly detailed popular 3dk.ca kits with your friends but please don't. 3dk.ca (Owner Calum Faorin-Cruich) has invested a lot of time and money to bring you the highest quality kits possible. In order for 3dk.ca to continue bringing you high quality kits your continued support is vital. For personal use only. Unauthorized distribution, copying, commercial exploitation, or modification in any way by the purchaser or any third party of this 3dk© publication is strictly prohibited without the owner's prior written permission.

WINDOW SILLS

It is not necessary to cut out the middle of the roof truss but it is essential to fit them in place as per the instructions to ensure the buildings structural integrity and to avoid any warping in the roof.

GLUE THIS SHEET TO THE WALL

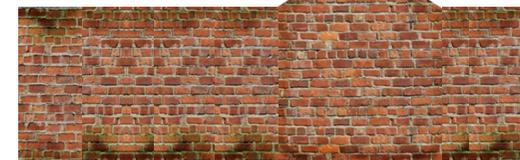

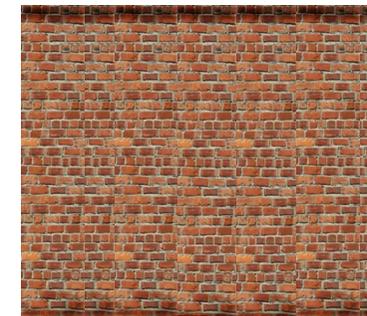

Lightly score down the middle and fold and fold backwards

CHIMNEY

There are more roof strips supplied than you require just in case any get damaged or spoiled during the assembly process.

ROOF STRPS

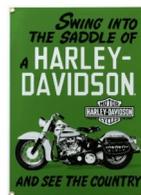

TOP

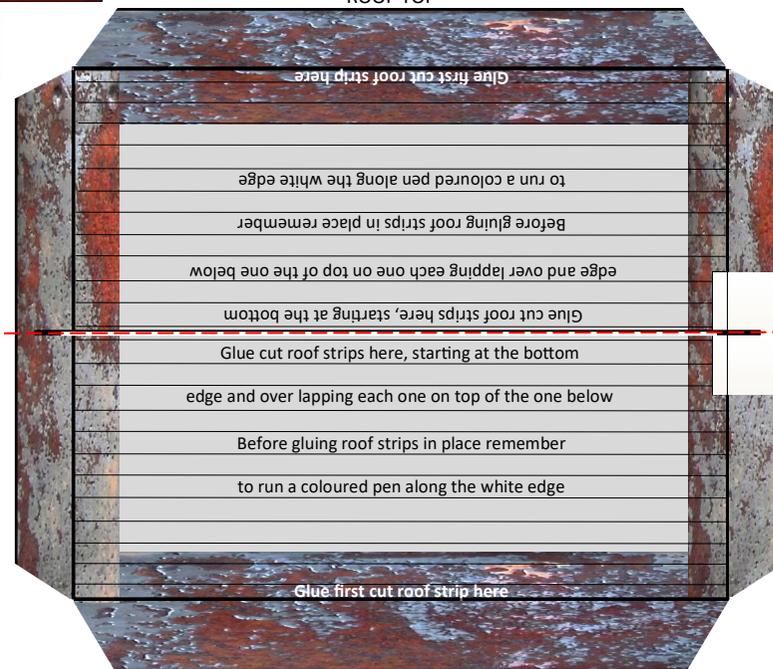

Before gluing roof strips in place remember to run a coloured pen along the white edge

Score down the middle or the red dotted line and fold back 45 degrees once you have glued the roof top onto the roof base.
